

OPERATIONAL INTELLIGENCE / MISSION CONTROL

Fragmented work, one decision surface.

A sanitized SPARTAN/ATLAS command-wall demonstration showing how priority, ownership, evidence, blockers, next actions, wake conditions, risk, and approval state stay visible without losing context.

SPARTAN 337 PROJECT / OPERATIONAL ANALYSIS DEMONSTRATION
PUBLIC-FACING, SANITIZED PROJECT DEMONSTRATION

- CURRENT TRUTH
- EXPLICIT OWNER
- EVIDENCE STATE
- APPROVAL CONTROL

OPERATIONAL CONTROL

REVIEW ● LE

One surface for current truth.

P0 Approval package

READY / evidence valid

P1 Source review

ACTIVE / evidence current

P1 Data exception

BLOCKED / evidence partial

P2 Recovery check

WAITING / evidence valid

CONTROL

Owner + blocker + next + wake

OPERATIONAL INTELLIGENCE / MISSION CONTROL

Operational Intelligence Command Wall

PROBLEM

Complex work fragments across messages, files, queues, and waiting states. Without one current surface, ownership becomes ambiguous and stale information is easily mistaken for current truth.

APPROACH

Normalize every active item into a controlled record: priority, owner, current state, evidence status, blocker, next action, wake condition, risk, and approval state. Waiting work is parked instead of repeatedly reprocessed.

Result: a decision surface that preserves ownership and current truth.

Representative queue data below is synthetic and sanitized; the control model reflects the SPARTAN/ATLAS operating method.

P0 Approval package

OWNER	Operator
STATE / EVIDENCE	READY FOR REVIEW / VALID
BLOCKER	Operator decision required
NEXT	Approve / decline prepared action
WAKE	Approval decision

APPROVAL REQUIRED

P1 Source evidence review

OWNER	Research
STATE / EVIDENCE	ACTIVE / CURRENT
BLOCKER	One source mismatch
NEXT	Resolve provenance conflict
WAKE	Verified source

APPROVAL N/A

P1 Normalization exception

OWNER	Data Ops
STATE / EVIDENCE	BLOCKED / PARTIAL
BLOCKER	Three unmapped fields
NEXT	Apply reviewed field map
WAKE	Schema decision

APPROVAL N/A

P2 Recovery verification

OWNER	Runtime
STATE / EVIDENCE	WAITING / VALID
BLOCKER	Checkpoint reconciliation
NEXT	Confirm durable queue state
WAKE	Health check pass

APPROVAL N/A
